seca 374

Digital baby scale with wireless transmission

EMR-integrated

- Immediate printout of measurements compared to statistical norms.

- Adjustable damping.

- High-quality seca scale technology with fine graduation.

- TARE, HOLD, auto-HOLD and BMIF for extra convenience.

- Solid surfaces prevent liquid penetration, eliminating cross-contamination.

- Optional measuring rod seca 233 expands scale into a measuring station.

seca®
Precision for health

seca 374:

Restless baby? Not a problem!

Ergonomic, convenient and time-saving: these are the key words that define the seca 374. Its extra large tray allows you weigh a seated toddler of up to 44 lbs, even if the child is fidgety. The adjustable damping function combined with the auto-HOLD function ensures fast and precise work. Even handwritten record keeping is a thing of the past, thanks to the seca 360° wireless technology. The scale can send results wirelessly to the seca 360° wireless digital printer or to the software seca analytics 115 on your PC.
The shell-shaped tray guarantees safety.

The seca 374 holds babies safely and comfortably in the shell-shaped weighing tray, whose ergonomic form was designed especially with the weighing of infants in mind. The slightly raised sides make the baby feel safe and secure while preventing the baby from slipping off the scale.

With seca 360° wireless technology and the press of a key, the seca 374 can send every measurement to a seca wireless printer or directly to your PC with the seca analytics 115 software.

High sides on weighing tray offer special protection from falling out.

TARE, HOLD and BMIF speed up the weighing process.

Net weight of a diapered baby? Choose TARE. The amount of milk breast-fed to a baby? Use the BMIF (Breast-Milk-Intake-Function). Read the results after tending to the baby? No problem, thanks to auto-HOLD.

An optional measuring rod for simultaneous weighing and measuring.

Measuring and weighing in one step? Yes – thanks to the optional measuring rod seca 233. Transmit the weight measurement wirelessly to the seca 360° wireless network? Just press SEND. You can do it from any location because the seca 374 is operated by batteries, so there's no need for electircal outlets.

With the optional measuring rod seca 233, the seca 374 becomes a complete weighing and measuring station.

Paperless and error-free wireless transmission of measurements.

With the seca 360° wireless technology the seca 374 can transmit measurements to the optional seca 360° wireless printer. With the network-capable software seca analytics 115 and wireless USB adapter seca 456, your PC can receive and analyze measurements and forward them to an Electronic Medical Records (EMR) system. Thus, the seca 374 is EMR-integrated and ready to handle digital patient records while meeting all the demands the future will bring. For more information about EMR-integration visit: www.seca.com

Technical data

- Capacity: 44 lbs / 20 kg
- Graduation: 0.2 oz < 22 lbs > 0.5 oz /
  5 g < 10 kg > 10 g
- Dimensions (WxHxD): 24.4 x 7.5 x 14.1" /
  620 x 190 x 358 mm
- Dimensions of weighing surface (WxHxD):
  24.2 x 5.1 x 10.8" / 615 x 130 x 275 mm
- Weight: 7.9 lbs / 3.6 kg
- Power supply: Batteries / power adapter (optional)
- Data transmission: wireless technology
  seca 360° wireless
- Functions: TARE, BMIF, auto-HOLD,
  auto-CLEAR, lbs/kg switch-over, damping,
  automatic switch-off, SEND/PRINT
- Optional: head and foot positioners seca 418,
  measuring rod seca 233, power-adapter seca 447,
  switch-mode power-adapter seca 400
- System compatible with: 360° wireless digital prin-
  ter advanced seca 466, 360° wireless digital printer
  seca 465, 360° wireless USB adapter seca 456,
  software seca analytics 115 and seca emr flash 101
- RS232 compatible
