seca 787

EMR-validated column scale with eye-level display

Advanced EMR-validated weighing technology

The seca 787 fully meets the demands of professional EMR (electronic medical record) integrated measuring and weighing. It boasts a tilt-proof full metal platform and a stable single piece column that is at eye-level and won't give way when operating the keypad. It is a quality every patient will notice, as soon they set foot on the platform. The scale is easy to move by staff due to the large rubber coated castors and a wide wheelbase.

Optional handrail for increased patient stability

To accommodate patients in need of extra support during the weighing process, the seca 787 is equipped with the option to add an integrated handrail (seca 477). The easy-to-mount handrail raises the level of patient security to a new level. The digital measuring rod is firmly attached to the column and provides a wide measuring range that is suitable for pediatrics to tall individuals. The two-lined display shows weight and height simultaneously and automatically calculated patients' BMI. The damping system and auto-HOLD function enable a quick a precise measurement.

seca integration solutions: How workflows can clearly be improved.

The seca 787 can be integrated into your information system via the network. At the push of a button, measured values can be sent directly to the EMR, where they are immediately available to all users. Extended with USB barcode scanner (available from third-party seller), both patient and user are identified and the measurement results are always correctly assigned. This saves time, increases process reliability and eliminates transmission errors.
