

Portable stadiometer

seca 213

- + Simple and easy to set up – no wall fastening necessary
- + Large floor plate ensures stability
- + Includes heel positioner for ideal three-point measurement
- + Easy to read thanks to the scale printed on the side and the reading window
- + The measuring rod can be dismantled and stored securely in the base for easy transport
- + Wall spacer for additional stability

Portable stadiometer

Precise reading of results

Adjusting the smooth-running measuring slide is extremely easy due to the large head plate. A further sophisticated detail is that, as the scale is printed along the side of the measuring rod, it is easy to read off the result while measuring, thus guaranteeing precise results – up to a height of 81 inch.

Quick and easy installation without wall mounting

The measuring rod (which can be dismantled into several pieces) of the seca 213 stadiometer can be easily and quickly installed on the base in a few simple steps. Additional attachments, e. g. on a wall, are no longer necessary.

Convenient and easy to transport

The seca 213 stadiometer can be taken anywhere it is needed. Compact in size with a carry handle and low in weight. The large base gives the seca 213 stadiometer a high level of stability and a secure position, so that it cannot be distinguished from a stationary stadiometer. These features make the seca 213 stadiometer the perfect work tool for anyone who needs reliable measuring devices at frequently changing locations.
