

EMR-validated wheelchair scale with handrail and optional third ramp

seca XLine Hold

- + Handrail equipped with an antimicrobial coating to enhance safety or serve as a standing aid
- + XXL dimensions and capacity to accommodate bariatric wheelchairs
- + Built to withstand the highest loads with a capacity of 1,100 lbs
- + Extra low profile ensures a smooth and safe transition for wheelchair access onto the platform
- + Third ramp available: upgrade your seca XLine and further improve accessibility
- + Tailor your experience by choosing between the basic display or the ID-Display™ with EMR-interface
- + Tare-by-Scanning: simplify the weighing process by taring out the weight of the wheelchair by scanning its barcode
- + EMR-validated, enabling seamless data transmission directly to an Electronic Medical Record (EMR) system or to a printer

EMR-validated wheelchair scale with handrail and optional third ramp

Effortless Weighing for Bariatric Patients

Introducing the seca XLine, a breakthrough in medical weighing technology that redefines the standard for weighing individuals in wheelchairs. Our innovation combines a remarkably flat profile, high capacity, and an expansive platform, ensuring the comfortable and easy weighing of individuals in bariatric or power wheelchairs. This advancement not only streamlines the tasks of healthcare personnel but also promotes quick, secure, and uninterrupted patient care. The ultra-stable handrail with antimicrobial coating provides an extra level of safety and can be used as a support for patients standing on the scale.

Precision Redefined with Tare-by-Scanning

Designed with safety in mind, the seca XLine goes beyond expectations to simplify the weighing process for individuals in wheelchairs. The large platform provides ample space, guardrails prevent accidental rolling off, and thoughtful details like the wall-mounted magnetic display-holder and an optional third ramp facilitate the workflow. The Tare-by-Scanning function further eases the workload by effortlessly taring out the pre-stored weight of the wheelchair through barcode scanning.

Tailored Interfaces for Seamless Workflow

In pursuit of enhanced efficiency and error-free processes, the seca XLine is fully validated for integration with various EMR systems. When integrated, the ID-Display™ shows essential information such as the patient's and user's name or ID, along with the date of birth. For those opting out of EMR integration or Tare-by-Scanning, a basic display is available. This flexibility ensures that you always have the interface that aligns perfectly with your specific needs.

Capacity	1,100 lbs / 500 kg
Graduation	0.2 lb / 100 g
Dimensions (WxHxD)	60 x 44.4 x 50.8 in / 1,523 x 1,127 x 1,290 mm
Platform (WxHxD)	43.3 x 2.2 x 43.3 in / 1,100 x 54.6 x 1,100 mm
Net weight	136.7 lbs / 62 kg
Power supply	Power adapter
Cable length	118 in / 3 m
Functions	Display of user and patient name or ID, Display date of birth patient, TARE, Pre-TARE, HOLD, Auto-HOLD, CLEAR, Auto-CLEAR, RESET, lbs/kg switch-over, lbs/kg switch-over lock, cm/inch switch-over, Adjustable damping, BMI, BSA (Body surface area), Standby mode
Interfaces	Ethernet, USB for barcode scanner, Wi-Fi
Accessories	+ Third ramp seca 405
